50 pieces

Precision CNC Machined Components OEM/ODM Accepted with Strict Control

Basic Information

- Place of Origin:
- Brand Name:
- Certification: 1
- Model Number:Minimum Order Quantity:
- Price: \$2.35 \$12.68/pieces
- Packaging Details:
- Delivery Time:
- Payment Terms:
- Supply Ability: 1000000 Piece/Pieces per Month

Product Specification

• OEM/ODM:	Acceptable
Lead Time:	7-15 Days
• MOQ:	1 Piece
Application:	Automotive, Aerospace, Medical, Etc.
Delivery Method:	DHL, FedEx, UPS, Etc.
Quality Control:	100% Inspection Before Shipment
• Size:	Customized
Tolerance:	±0.01mm
Highlight:	Precision CNC Machined Components, OEM CNC Machined Components, Strict Control CNC Machined Components

Our Product Introduction

Product Description:

We use a variety of materials to create our CNC Machined Parts, including Aluminum, Steel, Brass, and more. Each material has its own unique properties, allowing us to create custom components that meet the specific needs of our clients.

Quality control is a top priority for us, which is why we perform 100% inspection before shipment. We want our clients to be confident that they are receiving the best possible product, and our rigorous inspection process ensures that every component meets our high standards.

Our CNC Machined Parts offer exceptional precision, with tolerances as tight as ±0.01mm. This level of accuracy is necessary for many applications, including those in the Aerospace and Medical industries.

Our components are fully customizable to meet the unique needs of our clients. We work closely with our customers to ensure that every component is created to their exact specifications, ensuring that they receive the perfect product for their needs.

Overall, our CNC Machined Parts are an ideal solution for any application that requires precision components. With computerized machining and a commitment to quality, we are confident that our components will meet and exceed our clients' expectations.

Features:

Product Name: CNC Machined Parts

Drawing Format: PDF, DWG, IGS, STEP, Etc.

Size: Customized

Quality Control: 100% Inspection Before Shipment

MOQ: 1 Piece

Application: Automotive, Aerospace, Medical, Etc.

Features:

Computerized Numerical Cutting parts

Computer-aided manufacturing parts

Computerized machining parts

Technical Parameters:

Numerically-controlled machining parts	
OEM/ODM	Acceptable
Size	Customized
Drawing Format	PDF, DWG, IGS, STEP, Etc.
Tolerance	±0.01mm
Quality Control	100% Inspection Before Shipment
MOQ	1 Piece
Lead Time	7-15 Days
Application	Automotive, Aerospace, Medical, Etc.
Delivery Method	DHL, FedEx, UPS, Etc.
Packaging	Standard Export Carton Or Customized

Applications:

These precision machined parts have a wide range of application occasions and scenarios. They can be used in the aerospace, automotive, medical, and electronics industries, among others. These industries require parts that are accurate, reliable, and durable. The CNC machined parts from Yuanwenyu meet all these requirements and more.

One of the application scenarios for these precision machined parts is in the aerospace industry. This industry requires parts that can withstand extreme temperatures, pressure, and vibration. The CNC machined parts from Yuanwenyu are made using high-quality materials and undergo rigorous testing to ensure they meet these requirements. They can be used in the construction of aircraft engines, landing gear, and other critical components.

Another application scenario for these precision machined parts is in the automotive industry. The industry requires parts that are lightweight, durable, and have high performance. The CNC machined parts from Yuanwenyu meet all these requirements and more. They can be used in the construction of engines, transmissions, and other critical components.

The medical industry also requires precision machined parts that are accurate, reliable, and durable. These parts are used in medical devices such as implants, surgical tools, and diagnostic equipment. The CNC machined parts from Yuanwenyu meet all these requirements and can be used in the construction of medical devices.

Finally, the electronics industry also requires precision machined parts that are accurate and reliable. These parts are used in electronic devices such as smartphones, laptops, and other electronic components. The CNC machined parts from Yuanwenyu are made using high-quality materials and undergo rigorous testing to ensure they meet these requirements. They can be used in the construction of electronic components.

These precision machined parts have a minimum order quantity of 50 pieces and come at a price range of \$2.35 - \$12.68/piece. They

are packaged using EPE foam, anti-rust paper, stretch film, plastic bag +carton, and are delivered using DHL, FedEx, UPS, etc. The lead time for these parts is 7-15 days, and they can be customized to meet the specific needs of customers.

Customization:

Our Model Number 1X893 and OEM products are made in our Guangdong, China factory and come with certification. We require a minimum order quantity of 50 pieces, with prices ranging from \$2.35 to \$12.68 per piece. Packaging details include EPE foam, anti-rust paper, stretch film, plastic bag, and carton. Delivery time is 1, with payment terms to be discussed. We have a supply ability of 1000000 Piece/Pieces per Month and offer surface treatments such as anodizing, plating, painting, and more. Delivery methods include DHL, FedEx, UPS, and more, with a minimum order quantity of 1 piece.

Support and Services:

Our CNC Machined Parts product comes with comprehensive technical support and services to ensure proper installation and maintenance for optimal performance. Our team of experts is available to assist with any technical questions or concerns regarding the CNC Machined Parts product. In addition, we offer various services such as installation, calibration, and repair to ensure that the product is functioning at its best. Our technical support and services are designed to provide our customers with peace of mind and a reliable solution to any CNC Machined Parts-related issues.
